

Criteria for Phase Transition at Saint Andrew

Prepared by the Saint Andrew Plan to Gather Task Force

Council Approved: November 19, 2020

- Using information from the State DHS website: <https://www.dhs.wisconsin.gov/covid-19/local.htm> the Plan to Gather task force will look at the data for Marathon County to guide our decisions.
- The Guidelines from the Wisconsin Council of Churches recommend seeing "improving conditions" before progressing between phases. "Improving conditions" is defined as a decreased burden and a downward "trend" or a downward or no change in "trajectory" on the DHS's website for four consecutive weeks.
- If we are at "High, Very High, or Critically High Activity" **we stay at Phase 1.**
- If at any time the county or state declare a state of emergency or stay at home recommendation we will **return to phase 1.**
- If at any time an increased burden and trajectory occurs resulting in a "moderately high" or higher activity level at any stage for two consecutive weeks we will return to the **previous phase** if in phase 2 or 3.
- In phase 1, if after four consecutive weeks of low to moderate burden and downward or "no change" in trajectory we **move to Phase 2.**
- Once in phase 2, when Marathon County's status is "Low" to "moderate" burden and at a downward or "no change" in trajectory for at least an additional four consecutive weeks after being in Phase 2, we can **transition to Phase 3.**
- To move from phase 3 to the end of our phased transition – is still under consideration by the task force.

To get to Phase 2, these need to be true:

- Custodian available at 50% of hours with volunteers in place for cleaning.
- Adequate cleaning supplies available. Adequate is defined as a minimum of two weeks worth of supplies.
- Policy and Procedure written and training conducted for volunteers assisting with worship or cleaning.

To get to Phase 3, these also need to be true:

- Custodian available at 100%
- Updated rental use form
